

innuTaq DNA Polymerase

IST Innuscreen's innuTaq DNA Polymerase is a highly purified recombinant thermostable DNA polymerase that has been isolated from *E.coli* carrying a vector encoding the *Thermus aquaticus* DNA polymerase gene. The enzyme has 5' → 3' DNA polymerase activity. The extreme thermostability of the polymerase allows incubation at high temperatures (95 ° C). It is recommended for use in routine PCR reactions.
