

PME Sewage Water Enrichment tool

The PME Sewage Water Enrichment Tool is based on a new technology, called: PME – Polymer Mediated Enrichment. The procedure starts with capturing of cells and cell-free DNA from a large amount of liquid sample by a special polymer.

The next step is the centrifugation of captured cells and DNA. Subsequently, the pellet can be dissolved directly in a lysis buffer of the kit used for DNA/RNA isolation.

Product Name: 845-IR-0011050

Product details

Extract: DNA

Reactions: 10 / 50 / 100 / 250 (either or)

Sample type/Starting material: Sewage Water

Specifications:
Starting material

20 ml Sewage Water

Preparation time

Approximately 30-60 minutes

The online shop

Price: € 157.50

Content: 50 reactions
